

Florida Society for Healthcare
Risk Management & Patient Safety

Strategic Plan

2020- 2022

Mission

To empower our members by delivering professional development programs, disseminating best practice resources, engaging in regulatory/ legislative advocacy; and to support our members in their efforts to administer a comprehensive proactive risk management and patient safety program.

Vision

To be recognized as the leading healthcare risk management and patient safety advocacy group in Florida.

Core Values

Leadership: Empowering our members to maximize value, minimize risk and optimize patient safety through professional development, advocacy and collaboration.

Integrity: Ethical and transparent decision making, principled and trustworthy behavior, and honesty in communication.

Professionalism: A patient safety culture requires competency, teamwork, reliability and accountability by all staff to reduce potential errors and improve quality of care.

Professional Development

Goal

Provide CE designed to satisfy the ongoing educational competency standards established in Florida Law and national certifications for risk management and patient safety professionals.

Objectives

- Expand the RM 101 program to provide training to new members and potential risk managers who work in all healthcare settings.
- Promote CPHRM & CPPS certification and professional recognition through awards program.
- Offer leadership development opportunities that provide members with the skills necessary to transition from management to executive level positions.
- Utilize technology to enhance participant engagement and increase access to continuing education programs.

Advocacy

Goal

Promote the value of the risk management and patient safety professional and serve as a conduit for addressing issues related to healthcare policy and regulatory oversight.

Objectives

- Engage members in advocacy efforts including legislative/ regulatory activities (at the state and national level) that may impact healthcare risk management, patient safety and quality.
- Increase recognition and appreciation of risk management and patient safety professionals among the executive leadership team.
- Promote the adoption of public policy that is consistent with the national movement toward patient safety efforts that are focused on reducing preventable harm and systemic improvement.

Collaboration

Goal

Increase interaction between members and develop joint programming with other stakeholders.

Objectives

- Expand the mentor program to assist new members as they enter the profession.
- Utilize technology to provide a forum for the exchange of best practices and to increase networking and communication between members.
- Partner with other organization to advance the patient safety movement and disseminate data on the success of risk mitigation and pro-active risk management.
- Build partnerships to inspire innovation and transformation to improve patient and workforce safety.
